

## We Played Visteon's Request Through

## ST's Advanced Systems-on-Silicon.

When Visteon wanted high performance in their next generation audio products, who did they turn to? The choice was clear. STMicroelectronics.

ST provides a broad range of audio amplifiers, flash based micro controllers, and signal processors (digital and analog). These chip sets are the ideal solution for Visteon today, and paves the way for higher levels of integration in the new millennium.

STMicroelectronics is the proud winner of numerous quality awards, including the prestigious 1999 Malcolm Baldrige award.

Got a challenging application? ST is well poised to meet your Advanced Silicon needs.
